

Welder

About Jones Manufacturing

Jones Manufacturing Company has produced the most durable, high-capacity, operator-oriented hay grinder and mulch grinder in the world — the Mighty Giant tub grinder. The quality and durability of this equipment stem from more than 50 years of hands-on, in-the-field experience with every Mighty Giant we build.

Innovation begins at Jones Manufacturing. We were the first with a hydraulic opening tub (building our first unit in 1960), the first with an electronic governor, and the first with a hydrafork. From the single-discharge auger to the rubber-lagged top-drive elevator, no other grinder offers the features, capacity, and durability of a Mighty Giant.

New products and new features can sometimes lead to new problems. At Jones Manufacturing, our team maintains relationships with our customers to ensure that all features and designs are field-tested in the same environment as our customers face. This same relationship gives us the feedback we need so that new designs and innovations are the result of experience, not marketing hype.

Job Summary

Our company is seeking an experienced Welder to join our team! This position requires an individual who is committed to quality and has strong attention to detail. We are looking for adaptable, innovative, and enthusiastic problem-solvers who are continuously learning and growing their skills. We are looking for someone that fits our culture of teamwork, endless learning, and exceptional customer service.

Responsibilities

- Read blueprints, drawings, and schematics to determine job requirements
- Cut, bend, shape, weld, and assemble metal components to spec
- Operate fabrication equipment including saws, drill presses, grinders, flame cutters, and rollers
- Complete quality checklists, production time worksheets, and safety documentation
- Maintain a clean, organized, and safe workspace
- Collaborate with other departments to support the manufacturing process

Qualifications

- Proven experience as a welder in a manufacturing/shop environment
- MIG welding experience preferred, or willingness to learn
- Ability to read technical drawings and blueprints
- Strong math skills; hydraulic knowledge a plus
- Able to stand/walk up to 8 hours a day and lift 25+ lbs.
- High school diploma or equivalent and a clean driving record required
